

AI Enablement Specialist Video Concept & Script Outline

Video Goal

To demonstrate expertise in AI enablement, workflow optimization, and change management, specifically tailored for healthcare and government sectors, highlighting measurable impact and a structured approach to AI adoption.

Target Audience

Hiring managers and leadership at the client organization.

Key Messages

1. **Measurable ROI:** Focus on saving 2-5 hours per week for managers and directors.
2. **Sector-Specific Understanding:** Acknowledge and address the unique challenges and compliance requirements in healthcare and government.
3. **Holistic Approach:** Emphasize training, coaching, prompt engineering, and change management.
4. **Structured Program:** Highlight the 8-12 week enablement program with clear phases.

Video Structure & Script Outline

1. Introduction (0:00 - 0:30)

- **Visuals:** Professional headshot/facecam, clean background, subtle branding (if applicable).
- **Script:**

"Hello, I'm [Your Name], and I'm excited about the AI Enablement Specialist opportunity. With a proven track record in optimizing workflows and driving AI adoption, I help organizations like yours empower their teams to achieve significant productivity gains. My focus is on delivering measurable results, particularly within the critical healthcare and government sectors."

2. Understanding the Challenge & Our Approach (0:30 - 1:30)

- **Visuals:** Animated text/graphics highlighting key job requirements (e.g., "8-12 Week Program," "Healthcare & Government Focus," "2-5 Hours Saved/Week"). Transition to a visual representation of the structured program.

- **Script:**

"I understand that your goal is to drive AI adoption among managers and directors, aiming for a tangible impact: saving 2-5 hours per week. My approach is built around a structured 8-12 week enablement program, designed to navigate the unique complexities of healthcare and government environments, ensuring compliance and data security are paramount."

"This program begins with in-depth workflow audits to pinpoint inefficiencies and high-value AI opportunities. We then move into a pilot phase, developing role-specific prompt libraries and reusable AI systems."

3. Demonstrating Expertise: Before & After Workflow (1:30 - 3:30)

- **Visuals:** Screen recording demonstrating a common, inefficient workflow (e.g., drafting a policy brief, summarizing research, or responding to common inquiries) in a healthcare/government context. Then, show the same task being completed efficiently using AI tools (ChatGPT/Copilot) with well-engineered prompts. Highlight the time saved and quality improvement.

- **Script:**

"Let me show you how this translates into real-world impact. Consider a common task, such as [mention a specific task, e.g., 'drafting a preliminary policy brief based on multiple regulatory documents']. Traditionally, this can be a time-consuming process involving extensive manual review and synthesis."

"[Show inefficient workflow]."

"Now, imagine leveraging AI. Through carefully crafted prompts and an understanding of the AI's capabilities, we can transform this process. [Show AI-driven workflow, highlighting prompt engineering and AI output]. This isn't just about speed; it's about enhancing accuracy, consistency, and freeing up valuable time for strategic work."

4. Coaching, Change Management & Long-term Adoption (3:30 - 4:30)

- **Visuals:** Transition to facecam, perhaps with subtle graphics illustrating coaching sessions, training, and a growing "AI fluency" culture.

- **Script:**

"Beyond the tools, successful AI adoption hinges on effective change management and continuous support. My program includes group training sessions, personalized 1:1 coaching for non-technical leaders, and dedicated office hours for real-time guidance. The aim is to foster a culture of AI fluency, ensuring long-term, sustainable integration."

"I'll work closely with your internal AI workgroup, sharing best practices and driving collaborative innovation across teams."

5. Measuring Success & Conclusion (4:30 - 5:00)

- **Visuals:** Graphics showing metrics, feedback loops, and a final ROI report. Return to professional headshot/facecam.

- **Script:**

"Success is measured. We'll monitor usage, gather feedback, and track tangible time savings and efficiency gains, culminating in a comprehensive ROI report. My commitment is to ensure your managers and directors not only adopt AI but also become proficient, saving valuable hours and significantly boosting organizational capacity."

"I am confident that my expertise aligns perfectly with your vision for AI enablement. I look forward to discussing how I can help your organization achieve its goals."

Technical Considerations

- **Video Length:** Approximately 4-5 minutes.
- **Tools:** Screen recording software, video editing software. Familiarity with ChatGPT, Microsoft Copilot, or similar AI platforms for demonstration.
- **Audio:** Clear, professional audio is crucial.
- **Visuals:** High-quality screen recordings, professional appearance, clear on-screen text for key points.

Call to Action

Encourage the hiring team to envision the measurable impact and cultural shift the applicant can bring to their organization.
